

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A display for a computer system comprising a display screen and a support for supporting the display screen,
the support comprising a base and a column attached to the base,
the column being provided with a screen support part and with at least one connector to which a module of the computer system may be connected,
wherein the column comprises a front face that faces the display screen, a back face that faces away from the display screen, and opposed side faces provided between the front face and the back face, and wherein a plurality of connectors are located on at least one of the opposed side faces, and
wherein the plurality of connectors are disposed in a vertical, columnar arrangement on the column.

2. (Original) A display according to claim 1 wherein the connector is located such that when a module is connected thereto, the module is located at least partly behind the display screen.

3. (Previously Presented) A display for a computer system comprising a display screen and a support for supporting the display screen,
the support comprising a base and a column attached to the base,
the column being provided with a screen support part and with at least one connector to which a module of the computer system may be connected,
wherein the column comprises opposed side faces and wherein a plurality of connectors are located on each opposed side face.

4. (Previously Presented) A display according to claim 1 wherein at least one connector is connected to an output connection for communication with a processor unit of the computer system.

5. (Canceled).
6. (Canceled).
7. (Previously Presented) A display according to claim 1 wherein a power supply unit is located in a base module adjacent the column and behind the base.
8. (Previously Presented) A display according to claim 1 wherein the base comprises a pair of rearwardly extending arms interconnected by a forward part, and wherein the column is connected to the forward part.
9. (Previously Presented) A display according to claim 8 wherein the power supply module is adapted to be received in between the rearwardly extending arms.
10. (Original) A display according to claim 9 wherein the power supply module is adapted to supply power to the display screen and any modules connected to the support.
11. (Previously Presented) A display according to claim 1 wherein the column is foldably connected to the base.
12. (Previously Presented) A display according to claim 11 wherein the screen support part comprises a first rotating part located adjacent the column and a second pivotal connection in the vicinity of the screen whereby the support and screen support part may be folded into a collapsed configuration.
13. (Previously Presented) A display according to claim 1 wherein the column is provided with a screen support part comprising a sliding connection whereby the display screen is vertically slideable relative to the column.
14. (Previously Presented) A display according to claim 1 further comprising at least one module engaged with a connector on the support.
15. (Previously Presented) A computer system comprising a display according to claim 1.
